# Refining & Petrochemicals

Cents/lbs

Divergent Oil & Gas Prices lead to rise of Ethane advantage

# Advantage U.S. Ethylene

2012 Nameplate capacity	
	Tons/year
Asia (Exc. China)	24,906,000
China	13,778,000
Middle East	25,509,000
United States	28,121,132
Western Europe	24,384,000
Rest of World	26,704,294
<b>Total</b>	<b>143,402,426.00</b>

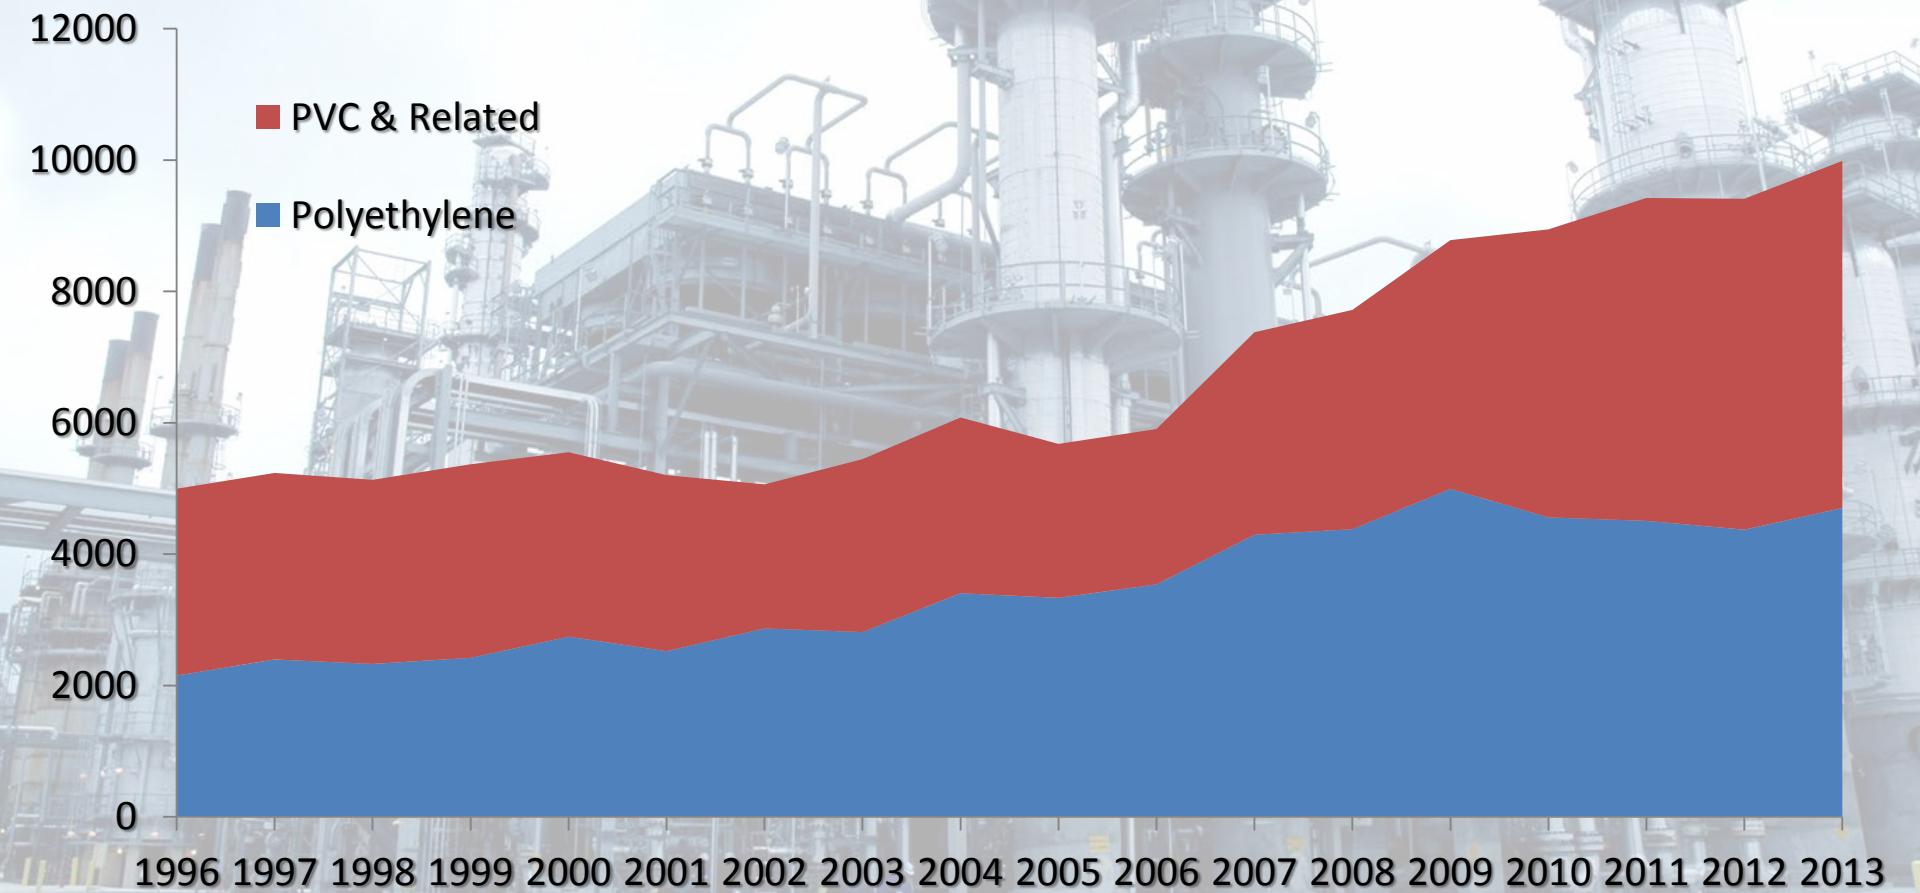

SOURCE: Oil & Gas Journal International Survey of Steam Crackers

Note: The percent of nameplate capacity that reported feedstock mix varies

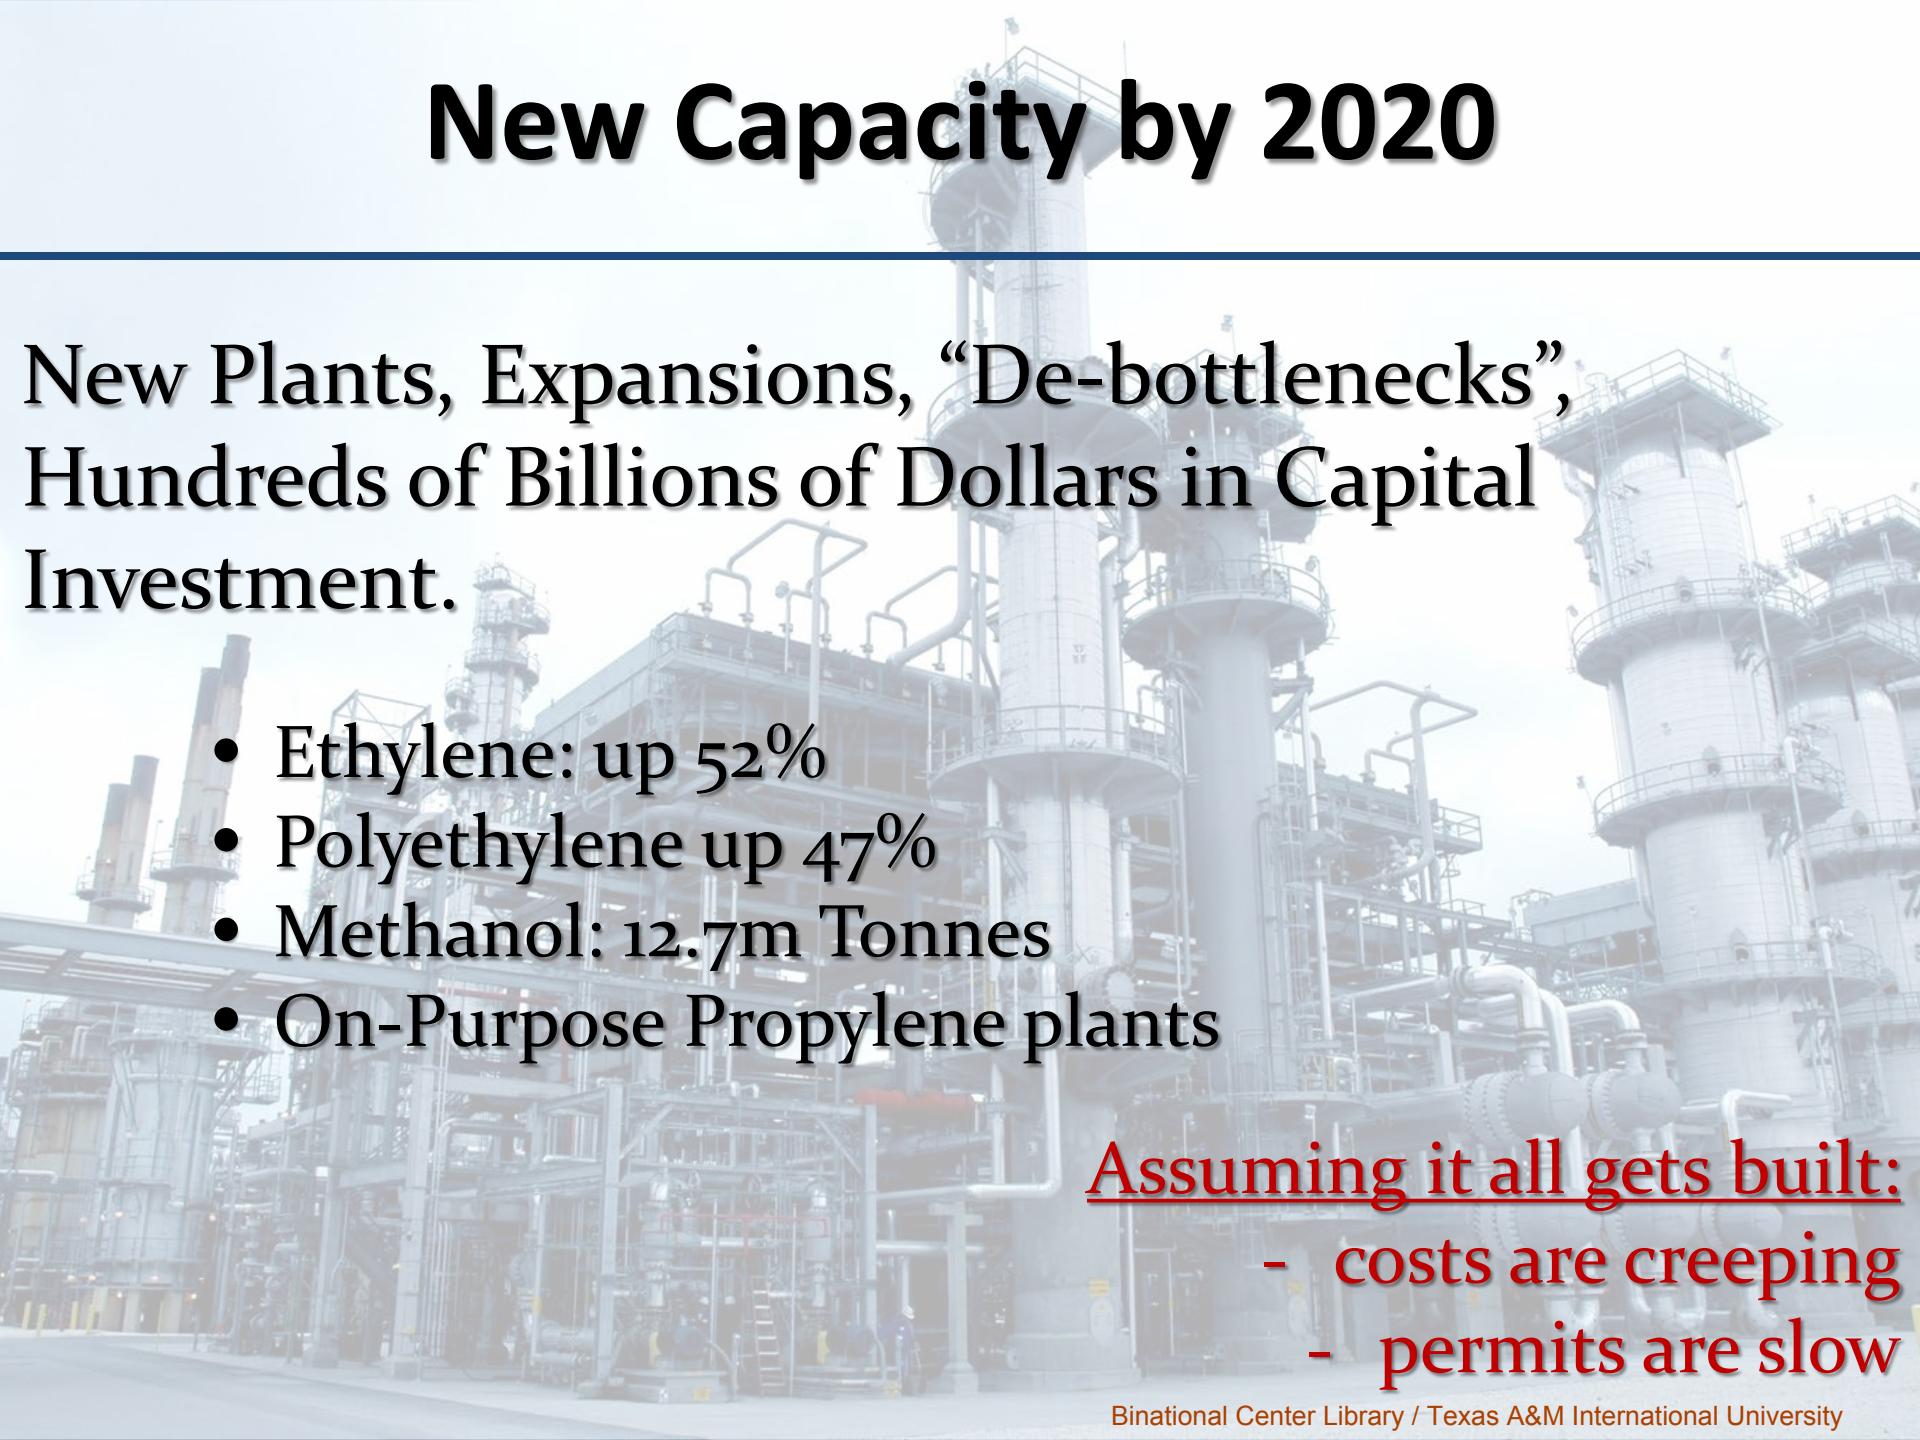

# Ethylene Chemistry In Exports

Exports grow, then flatten out

Thousands of tonnes

# New Capacity by 2020

A large industrial chemical plant with several tall, cylindrical storage tanks and complex networks of pipes and walkways. The structures are made of steel and have various levels and platforms. The background is slightly hazy, suggesting an outdoor industrial setting.

New Plants, Expansions, “De-bottlenecks”,  
Hundreds of Billions of Dollars in Capital  
Investment.

- Ethylene: up 52%
- Polyethylene up 47%
- Methanol: 12.7m Tonnes
- On-Purpose Propylene plants

Assuming it all gets built:

- costs are creeping
- permits are slow

# Outlook

- The Global Economy is Slowing?

**Outlook is Positive**

# The Hydrocarbon Hat Trick

A photograph showing the silhouettes of two people on horseback against a vibrant sunset or sunrise sky. The sky is filled with warm orange, yellow, and red hues. The figures are dark, making them stand out against the bright background. The scene suggests a rural or western setting.

**How shale is impacting the energy industry**

Jesse Thompson

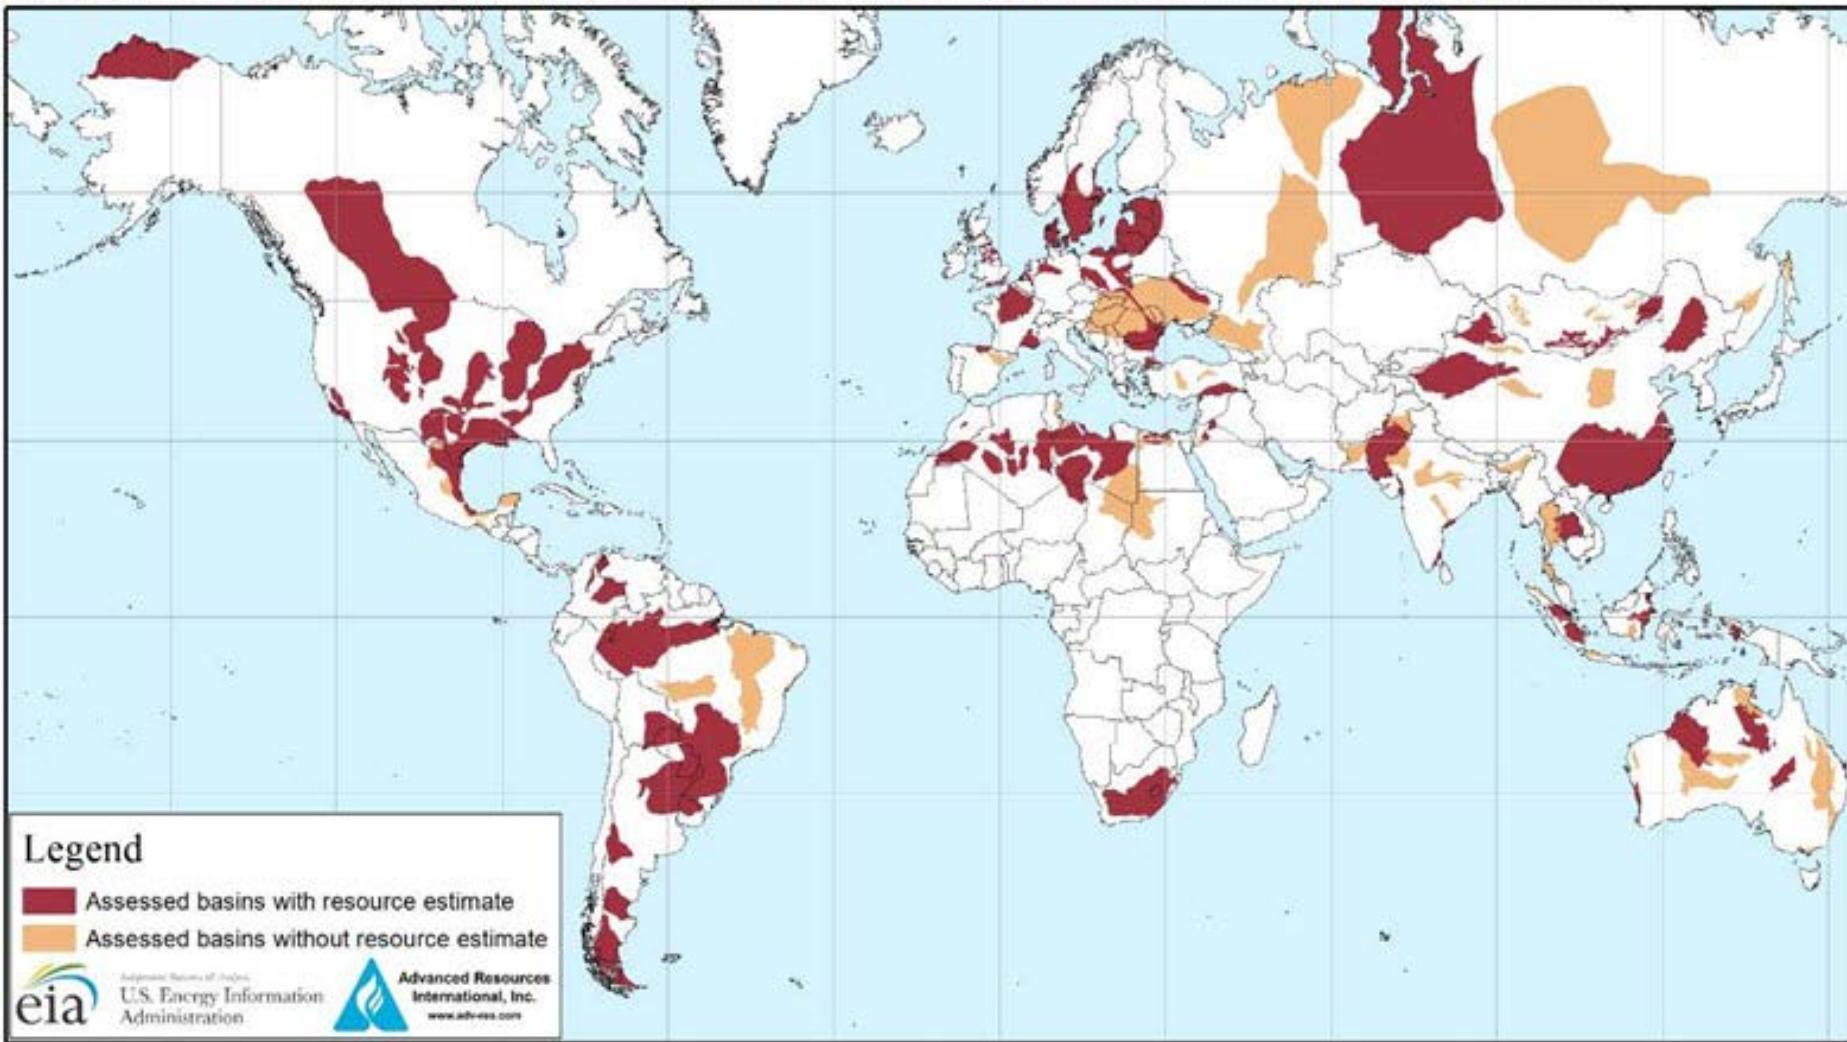

Regional Business Economist

The Federal Reserve Bank of Dallas, Houston Branch

April 2014

# Everyone has shale

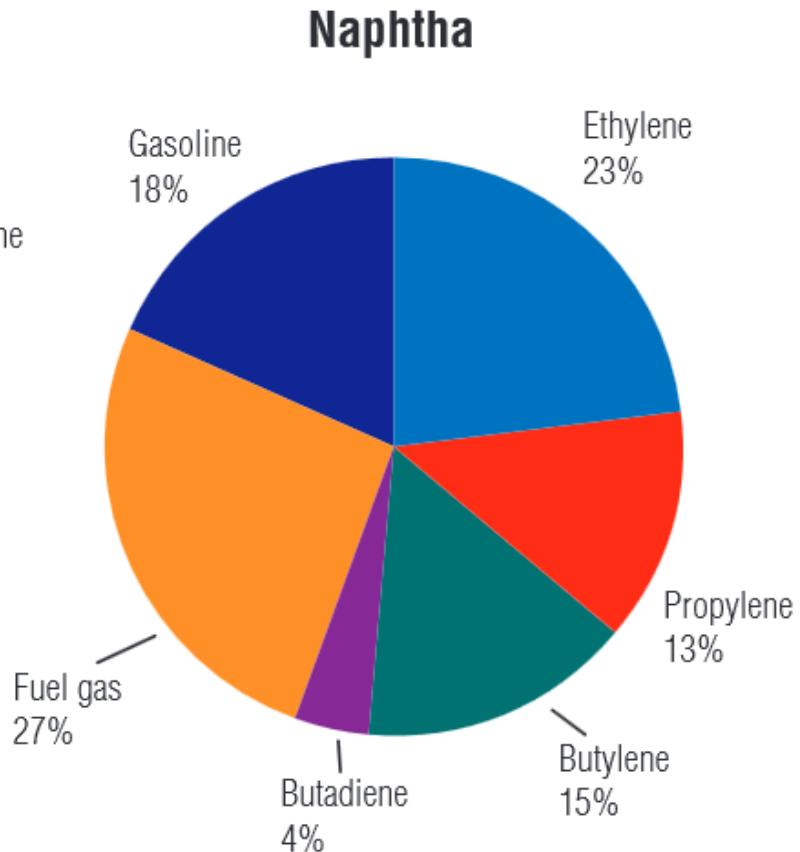

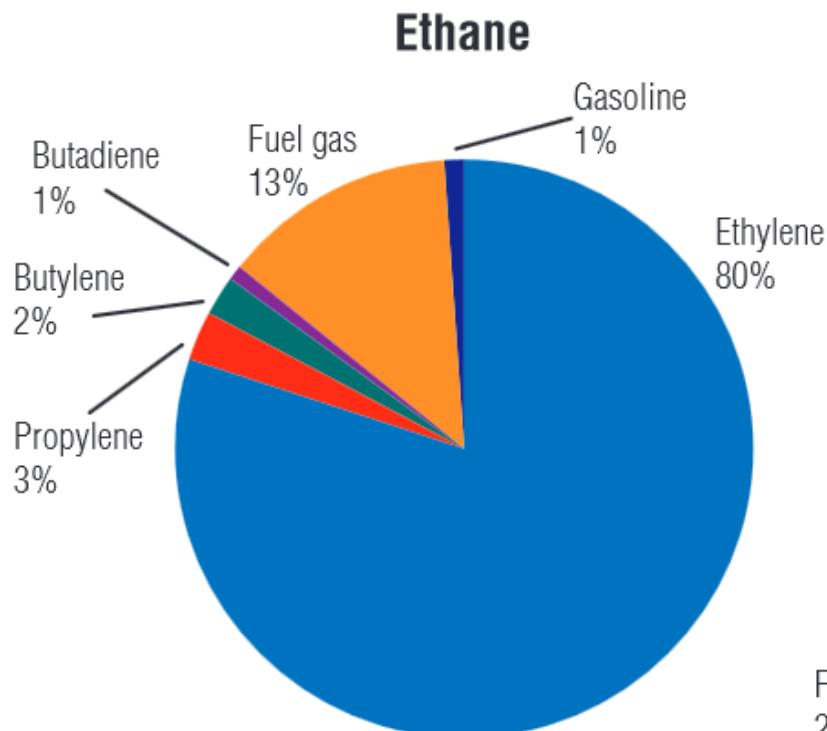

Figure 1. Map of basins with assessed shale oil and shale gas formations, as of May 2013
