

ASSESSMENT REPORT FOR

Bachelor of Science Degree in Fitness and Sports All-Level Certificate(BS)
Instructional Degree Program

Spring 2003
Assessment Period Covered

April 28, 2003
Date Submitted

Expanded Statement of Institutional Purpose Linkage:

Institutional Mission Reference:

Texas A&M International University, a Member of The Texas A&M University System, is committed to the preparation of students for leadership roles in their chosen profession and in increasingly complex, culturally diverse state, national, and global society ... Through instruction, faculty and student research, and public service, Texas A&M International University is a strategic point of delivery for well-defined programs and services that improve the quality of life for citizens of the border region, the State of Texas, and national and international communities.

College/University Goal(s) Supported:

The mission of the College of Education at Texas A&M International University is to provide a comprehensive and coherent professional development system for educators who link all aspects of the educational profession. Through educational experiences provided by this system, educators will be prepared to provide learner-centered instructional experiences that promote excellence and equity for all students in the field.

Intended Educational (Student) Outcomes:

- 1.** Students completing the educator preparation program will compare favorably with students in other educator preparation programs on their knowledge of instructional design and assessment to promote student learning.
- 2.** Students completing the educator preparation program will demonstrate the skills related to implementing effective, responsive instruction and assessment.
- 3.** Students completing the educator preparation program will compare favorably with their knowledge of physical development and maintenance to promote physical fitness with students completing similar programs statewide.
- 4.** Students will be able to develop assessment tools commonly used in Fitness and Sports.
- 5.** Students will be able to evaluate a variety of school and community events.

ASSESSMENT REPORT FOR

Bachelor of Science Degree in Fitness and Sports All-Level Certificate(BS)
Instructional Degree Program

Spring 2003
Assessment Period Covered

April 28, 2003
Date Submitted

Intended Educational (Student) Outcome:

NOTE: There should be one form for each intended outcome listed. The intended outcome should be restated in the box immediately below and the intended outcome number entered in the blank spaces.

1. Students completing the educator preparation program will compare favorably with students in other educator preparation programs on their knowledge of instructional design and assessment to promote student learning.

First Means of Assessment for Outcome Identified Above:

1a. Means of Program Assessment & Criteria for Success:

The average score of students completing the educator preparation program will be at or near 70% or a minimum of 240 on the Texas Examination of Educator Standards (TEXES) on the Pedagogy and Professional Responsibilities, Domain I entitled Designing Instruction and Assessment to Promote Student Learning.

1a. Summary of Assessment Data Collected:

Out of a population of 100 students, only 50 took the Pedagogy and Professional Responsibilities (PPR) Test of the new Texas Examination on Educator Standards (TEXES) during 2002-2003. The remaining 50 students either took the Examination for Certification of Educators in Texas (ExCET) or had not tested at the time this report was prepared. On average, the students who took the PPR Examination obtained 77.4% of the items correct on Domain I. An analysis of the students' performance on the four competencies comprising Domain I indicated that their two strongest areas were Competency #3 (Understands how to design effective instruction and assessment procedures) with 83.5% accuracy and Competency #2 (Understands and applies concepts related to student diversity) with 77.5% accuracy. On Competency #1 (Understands and applies human developmental processes), students demonstrated 76.7% accuracy and 71.8% accuracy on Competency #4 (Understands and applies learning processes and factors to plan effective instruction and assessment). Despite these differences, students' performance on Domain I and the respective competencies indicates that they exceeded the 70% criterion.

1a. Use of Results to Improve Instructional Program:

Students' performance data will be shared with and examined by appropriate faculty to determine how best to incorporate these components into teaching – learning experiences provided by the educator preparation program. TExES data will also be disaggregated by levels of certification sought (i.e., Early Childhood – 4th grade, 4th –8th grade, and 8th –12th grade) and by specializations within each of these certification levels to help faculty identify program strengths and areas that need modification.

Second Means of Assessment for Outcome Identified Above:**1b. Means of Program Assessment & Criteria for Success:**

At the Portfolio Defense, students completing the educator preparation program will provide evidence of knowledge of instructional design and assessment with a score of 80% or better, as determined by a team of field supervisors using a common rubric.

1b. Summary of Assessment Data Collected:

Spring 2002 and Fall 2002 Block II Data collected from 104 students through the use of the Internship Interview Rubric indicated that 103 (99%) of the students successfully participated in the interview process and were subsequently admitted into the internship experience. During this interview, students demonstrated appropriate knowledge of instructional design and assessment. Of the 104 students interviewed, six were identified as needing to strengthen their understanding of how to successfully work with students having special needs. With appropriate guidance and support from TAMIU faculty, these students successfully addressed this issue.

1b. Use of Results to Improve Instructional Program:

The data mentioned above will be shared with program faculty to determine how best to incorporate it into the educator preparation program. Program faculty will also examine and revise, as needed, the means of assessment utilized at this point in the educator preparation program to better identify program strengths and areas needing modification.

Intended Educational (Student) Outcome:

NOTE: There should be one form for each intended outcome listed. The intended outcome should be restated in the box immediately below and the intended outcome number entered in the blank spaces.

2. Students completing the educator preparation program will demonstrate the skills related to implementing effective, responsive instruction and assessment.

First Means of Assessment for Outcome Identified Above:

2a. Means of Program Assessment & Criteria for Success:

The average score of 90% of students completing the educator preparation on the Field Performance Evaluations will be at or near 85%, with no score lower than 65%.

2a. Summary of Assessment Data Collected:

Data collected from 69 students during the Fall 2002 and Spring 2003 semesters through the use of the Field Performance Evaluations revealed that their scores ranged from 72 to 98 and that the mean for the group was 88.8. Students were particularly capable of communicating information in an accurate, clear, and logical manner to their students. A trend observed among some students is that they need to make sure that children are attentive before beginning the lesson. Overall, the desired performance standard was exceeded.

2a. Use of Results to Improve Instructional Program:

The data mentioned above will be shared with program faculty to determine how to best incorporate these insights into the educator preparation program. Program faculty will also re-examine and possibly revise the assessment instrument used at this point in the educator preparation program to help them identify program strengths and areas of need.

Second Means of Assessment for Outcome Identified Above:

2b. Means of Program Assessment & Criteria for Success:

At the Portfolio Defense, students completing the educator preparation program will provide evidence of performance of instructional design and assessment with a score of 80% or better, as determined by a team of Field Supervisors using a common rubric.

2b. Summary of Assessment Data Collected:

During the Fall 2002 and Spring 2003 terms, 113 Block III students prepared and presented their portfolios for evaluation. Ninety-eight percent (111) of the 113 students earned a score of 80% or higher on their portfolios. The other two students obtained scores of 75% and 78%. The average score obtained by the 113 students was 93.7%. as part of the portfolio presentation, students demonstrated an appropriate understanding of instructional design and assessment.

2b. Use of Results to Improve Instructional Program:

A team of educators working with the educator preparation program will re-examine the rubric used to assess students' performance while defending their portfolios to determine if any modifications to the rubric and/or program are needed. The rubric will then be used to help educators monitor program strengths and areas of need.

Intended Educational (Student) Outcome:

NOTE: There should be one form for each intended outcome listed. The intended outcome should be restated in the box immediately below and the intended outcome number entered in the blank spaces.

3. Students completing the Educator Preparation Program will compare favorably with their knowledge of physical development and maintenance to promote physical fitness with students completing similar programs statewide.

First Means of Assessment for Outcome Identified Above:

3a. Means of Program Assessment & Criteria for Success:

The average score of students completing the Educator Preparation Program will score at or near 70% of the Examination for the Certification of Educators in Texas (ExCET) on the Physical Education Exam Domain I.

3a. Summary of Assessment Data Collected:

Second Means of Assessment for Outcome Identified Above:

3b. Means of Program Assessment & Criteria for Success:

The average score of the students completing the Educator Preparation Program consisting of a battery of physical fitness tests will be at or near 80%.

3b. Summary of Assessment Data Collected:

The students scored an average of 87% on the Examination for the Certification of Educators in Texas (ExCET) on the Physical Education Exam Domain I.

3b. Use of Results to Improve Instructional Program:

Since the criteria was met, no changes should be done at this time.

Intended Educational (Student) Outcome:

NOTE: There should be one form for each intended outcome listed. Intended outcome should be restated in the box immediately below and the intended outcome number entered in the blank spaces.

4. Students will be able to develop assessment tools commonly used in Fitness and Sports.

First Means of Assessment for Outcome Identified Above:

4a. Means of Program Assessment & Criteria for Success:

Students will average at or near 85% on the development of a cognitive test over material in their area of interest using a common rubric developed by the Fitness and Sports Faculty.

4a. Summary of Assessment Data Collected:

Students score on average of 91% on the development of a cognitive test using a common rubric developed by Fitness and Sports Faculty.

4a. Use of Results to Improve Instructional Program:

Since the scores on the cognitive test met the criteria set, there should not be changes done at this time.

Second Means of Assessment for Outcome Identified Above:

4b. Means of Program Assessment & Criteria for Success:

Students will score at or near 85% on the development of a psychomotor test over material in their area of interest using a common rubric developed by the Fitness and Sports.

Intended Educational (Student) Outcome:

NOTE: There should be one form for each intended outcome listed. The intended outcome should be restated in the box immediately below and the intended outcome number entered in the blank spaces.

5. Students will be able to evaluate a variety of school and community events.

First Means of Assessment for Outcome Identified Above:

5a. Means of Program Assessment & Criteria for Success:

Students will document at least 100 hours in the following areas:

Elementary 25 hours
Coaching 25 hours
Community 50 hours
