

CORONA VIRUS 2019 (COVID-19)

Coronaviruses are a large family of viruses that cause illnesses ranging from the common cold to more severe illness. The Novel Coronavirus is a new strain that has been identified as the cause of an outbreak of respiratory illness first detected in Wuhan City, Hubei Province, China.

We can all help prevent the spread of the Novel Coronavirus and all other respiratory illness.

HOW IS IT SPREAD?

Coughing and sneezing

Close personal contact

Not washing hands

Touching your mouth, nose, or eyes

SYMPTOMS

Symptoms may appear in as few as 2 days or approximately 2 weeks after exposure. Symptoms may include:

Fever

Cough

Difficulty breathing

PREVENT THE SPREAD!

There is currently no vaccine to prevent the Novel Coronavirus.

- Wash your hands often with soap and water for at least 20 seconds
- Do NOT touch your eyes, nose, or mouth with unwashed hands
- Avoid close contact with people who are sick
- Cover your cough and sneeze with a tissue, then throw the tissue in the trash
- Clean and disinfect objects and surfaces
- Stay home from work or school if you have a fever or are not feeling well.

If you have symptoms, contact a healthcare provider.
