#	Response Text
1	I had no problems with his class
2	The quality of the video was around a 480p youtube video.
3	it was a good experience and awesome technology
4	they were of really good quality
5	Class was awesome!
6	I felt that this class was overall a great experience and that my learning ability was not limited by videoconference
7	Great Experience , Video conference made my life better
8	none
9	It was a great experience having this class and it made me feel more open to people.
10	N/A
11	It was a great experience and i really learned a lot. I also feel more comfortable talking in front of a class or a big crowd after this class.
12	Distance learning is just as successful as face-to-face learning.
13	The distance learning video conference experiences is good because it makes you be able to learn a different way and to be able to prepare for college. On the other hand, having a distance learning/ video conference is sometimes hard to pay attention or sometimes have trouble with the communication.
14	Everything was good except for some problems at the beginning of the course but later was fixed .
15	I probably will never take an online class ever again. Basically because I didn't really like learning through a long distance video conference. It would be more useful for me to work with a teacher face to face. I'm sure I would get the help I need and I wouldn't be afraid to raise my hand and ask questions.
16	I think that the videos were a bit hard because at first we had to figure out on the first view until we probably reached the third view. Even though the hard times we had with these videos I think they were worth it because at the end I still learned.
17	There would occasionally be technical problems while we were video conferencing that made it hard to focus on the lesson and took away time from us.
18	NO THANK YOU :)
19	The help provided by our instructors was very good
